

STRATEGIC TARGET SOLUTIONS

The automotive market was the decisive driver for most of the innovations in our company.

We supply O-Rings and Gaskets for all kind of drives in our compounds, with our design, in co-design or in our customer's design.

In recent years, temperature and media resistance requirements have continued to rise. Electrification and the necessary new developments are another challenge. We are a full-scale partner in the largest and most challenging market for seals. With our plants in Europe and China, we can serve the requests, developments and needs of all platforms local for local.

Our added values:

- Material and product design
- Application expertise
- Local-to-Local presence

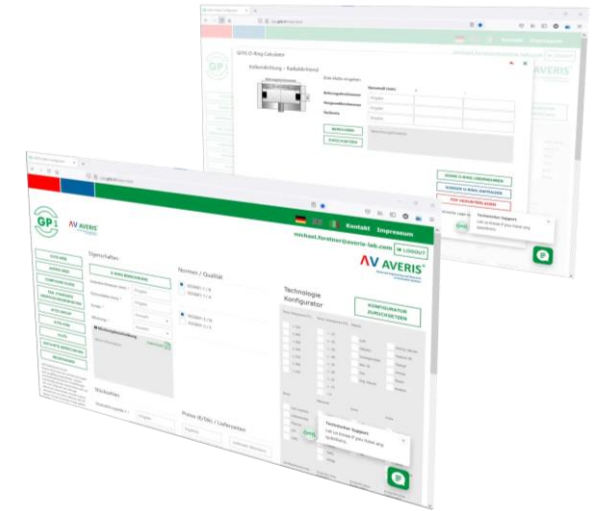

We focus on strategic markets where our technologies can add the most value for our customers.

In critical temperatures and media, as well as application design, we offer specific material and product design solutions.

Exhibit: Gas pressure valve

For industrial applications, our GP1 O-Ring configurator is an online tool for purchasing and technicians:

Our added values:

- O-Ring Configurator
- Technology Configurator
- Instant price&lead time (password)

O-Rings: Our high-quality O-Rings are the best choice for reliable sealing solutions, offering secure, long-lasting application performance even in challenging media and environments.

WHY GITIS

High Quality production plants
in Europe and Asia
